ADMISSION.

Candidates for admission to the Freshman Class are examined in the Grammar of the Latin and Greek languages, Virgil, Cicero's Select Orations, and Sallust or Cæsar's Commentaries, Arnold's Latin Prose Composition eight chapters, Xenophon's Anabasis and two Books of Homer's Iliad, English Grammar, Arithmetic, Robinson's Algebra through Quadratic Equations and two Books of Loomis's Geometry. The Faculty will insist on these requirements, or an equivalent. Students are very often deficient in Latin and Greek Prosody and Orthöepy, and in the Greek Accents. A knowledge of these is strictly required.

Candidates for higher standing are examined in the same, and also in the studies gone over by the Class, to which they may desire admission.

The stated times for examination are the Tuesday preceding Commencement, and the first day of the following Term. But in special cases, candidates may be examined and admitted at other times in the year, excepting that no admission to the Senior Class is allowed later than the beginning of the second Term.

Previously to examination, the candidate must exhibit satisfactory testimonials, that he sustains a good moral character. If he has been a member of any other College, he will be expected to present a certificate of regular dismission.

No one can be admitted to the Freshman Class, until he has completed his fourteenth year; and no one to an advanced standing without a corresponding increase of age.

TEXT BOOKS.

Natural Theology, Mineralogy, Botany, Zoology, Anatomy, and Physiology are taught chiefly by Lectures and subsequent examinations. The works recommended in these branches are the Bridgewater Treatises, Shepard's and Dana's Mineralogy, Gray's and Wood's Botany, Agassiz and Gould's Zoology, Hitchcock's Anatomy and Physiology, Wilson's Anatomy, and Carpenter's Physiology.

The following books are recommended for reference in the Classical Department: Andrews and Stoddard's and Zumpt's Latin Grammars, Andrews's or Leverett's Latin Lexicon, Döderlein's Latin Synonyms, Crosby's and Kühner's Greek Grammars, Liddell and Scott's Greek Lexicon (Drisler's Edition), Munk's Greek and Roman Metres, Anthon's Classical Dictionary, Long's Ancient Atlas, and Smith's Dictionaries of Geography, of Biography and Mythology, and of Greek and Roman Antiquities.

Text-books in Modern Languages: Douay's German Grammar, Adler's Progressive German Reader, Schiller's William Tell, Fasquelle's New Method with the French, Fasquelle's Napoleon, Madame De Stael's Germany. For reference: Tiark's German Grammar, Adler's German Dictionary, and Spiers and Surenne's French Dictionary.

For text-books in other Departments, see Course of Study and Instruction.

EXERCISES.

There are three regular Recitations or Lectures daily, excepting Wednesday and Saturday, when there are two.

On every Wednesday afternoon, there is a public Exercise in Declamation, in which the classes speak by divisions, and for which they are prepared by private rehearsal before the Professor of Rhetoric, or the Instructor in Elocution. Seniors and Juniors deliver original Compositions.

Biblical Instruction is given to each class during some portion of every year.

Public Worship is attended in the Chapel every Sabbath; and Prayers every morning and evening. Every Thursday evening, there is a Religious Lecture by the President, or one of the Professors, which the students are invited, but not required to attend.

LECTURES.

First Term. Zoology, Mental Philosophy, Biblical Theology.

Second Term. Political Economy, Moral Philosophy, Natural Theology.

Third Term. Anatomy and Physiology, illustrated by the Manikin, Chemistry, History of Philosophy, Botany, Mineralogy, Geology.

Each Term. Rhetoric and English Literature, Natural Philosophy, Classical Literature.

EXAMINATIONS.

1. Oral Examinations of all the Classes, at or near the close of each Term, on the studies of the Term.

2. Written Examinations of all the Classes, near the close of each year, on the studies of the year.

A Record is kept by the Faculty of the attainments of every student, and also of his delinquencies. Information concerning his proficiency and deportment is, when requested, communicated to the parent or guardian.

EXPENSES.

The following are the principal necessary expenses, exclusive of vacations:

Tuition, $12.00 per Term, - - - -	$36.00	$36.00
Room Rent, $3.00 per Term,*	9.00	9.00
Recitation Rooms, and Ordinary Incidentals, $3.00 per Term. - - - - -	9.00	9.00
Fuel and Lights, from $9.00 to $11.00, - -	9.00	11.00
Board, lowest price in companies, $1.75 per week; highest price in families, $3.00 per week; making per year of *thirty-nine* weeks. -	68.25	117.00

The expenses for Room Rent, Fuel and Lights, are estimated on the supposition that two students occupy the same room.

In case of admission to an advanced standing, $5.00 per term for the previous terms will be required, unless such standing shall have been

* For certain choice rooms, a higher price is paid.

attained in another College. This charge is sometimes for special reasons, particularly in case of indigent students, remitted by the Prudential Committee.

There are some expenses, which result from taxes voluntarily imposed by the classes or societies. These, and expenses for furniture, stationery, &c., will vary according to circumstances and the character and habits of the student.

In incidental expenses, if the parent or guardian furnishes money, or authorizes the contracting of debts, a student may be very extravagant. To guard against this, parents often deposit funds with some one approved by the Faculty, who, for a moderate compensation, will give particular attention to the pecuniary affairs of the student, and render an account of expenditures.

It is earnestly recommended to all parents and guardians, not to authorize the obtaining of credit, and not to pay debts unauthorized.

PAYMENTS.

The amount of the first Term Bill must be paid by each student on his admission. Each subsequent Term Bill becomes due at the close of the Term for which it is assessed, and payment is required at the beginning of the following term. A bond with satisfactory surety for the payment of all the College Bills must be given by each student to the Treasurer, at the commencement of the Term when he enters.

ASSISTANCE TO BENEFICIARIES.

The regular Term Bills of beneficiaries of Charitable Associations, and other indigent pious youth preparing for the Christian Ministry, are chiefly paid from the fund appropriated to that purpose. A number of indigent students are gratuitously supplied in part with furniture. Students are allowed to teach school each year, twelve weeks, including the nearest vacation, if their pecuniary circumstances require it.

LIBRARIES.

The Libraries of the College and Literary Societies contain about 23,000 volumes. The College Library is accessible to all the students, according to rules established by the Library Committee. The Libraries belonging to the two Literary Societies are accessible to the members of the Societies, according to regulations established by themselves.

PHILOSOPHICAL CABINET.

The Apparatus for experiments in Natural Philosophy is arranged in No. 3, Chapel Building. It contains many original articles, and by its extent is adapted for a full course of experimental illustration.

THE LAWRENCE ASTRONOMICAL OBSERVATORY.

This is attached to one of the Cabinets of Natural History, and consists of a tower and transit room. The former has a revolving dome, containing a fine achromatic telescope mounted equatorially, of nine feet focal length, and seven and one fourth inches in aperture, manufactured by Alvan Clark, Esq., of Cambridgeport. The transit room contains a transit circle, and an astronomical clock. The telescope of the transit circle has a focal length of about three feet. The circle was graduated by Gambey of Paris.

CHEMICAL LABORATORY.

The whole lower story of the new Williston Hall, eighty feet by forty, is appropriated to a Laboratory, both for lectures and for analysis. These rooms recently completed have been fitted up with a valuable apparatus suitable for an extensive course of Chemical experiment. The Laboratory will be kept open for special students as well as under-graduates through the year.

CABINETS OF NATURAL HISTORY.

The College has now two large buildings, two stories in height, devoted to Natural History. The following collections are placed in them:

1. IN THE OCTAGONAL CABINET.

In the lower room, forty feet in diameter, is placed the *Woods Geological Cabinet*, which contains 20,000 specimens of American and foreign rocks and fossils. To this cabinet the *Sweetser Geological Lecture Room* is attached.

The upper room is devoted to the *Shepard Mineralogical Cabinet* containing some 6,000 specimens of minerals, of the choicest character, fully arranged and labeled for study. Here also is displayed the largest collection of Meteorites in the world, save that of the Imperial Cabinet at Vienna, which has a very few more specimens.

2. IN THE APPLETON CABINET.

This building, erected in 1855, by the Trustees of the will of the late Samuel Appleton, is one hundred and ten feet long, and forty-five feet wide, with a lecture room attached. The lower story contains the *Ichnological Cabinet*, presenting some 9000 examples of tracks in stone. The upper room is devoted to the *Adams Zoological Cabinet*, containing 2500 specimens of 700 species of vertebrated animals, 8,000 species of shells, 5,000 species of articulated animals, and 200 species of radiated animals; and an Herbarium, of more than 4000 species of dried plants with the cuttings and seeds of tropical plants and trees, besides Prof. Tuckerman's private collection of Lichens, consisting of 800 species.

THE DICKINSON NINEVEH GALLERY.

In 1857, Enos Dickinson, Esq., of South Amherst, added a room to the Woods Cabinet, for the reception of the large collection of specimens obtained by Dr. Henry Lobdell from the ruins of ancient Nineveh and Babylon. Six large sculptured slabs are placed in the walls as they originally stood in the palace of Sardanapalus at Nimroud. Above them twenty-five fresco paintings of other figures found in the same ruins have been added. In the horizontal cases are cylinders and gems from the same cities, 1000 coins, ancient and modern, casts of medals, and relics of the American Indians. The Indian collection, containing 1100 specimens, was presented by Edward Hitchcock, Jr., M. D.

The Society of Inquiry have a collection of articles, mostly sent by missionaries, illustrating the habits of various nations.

WILLISTON HALL.

This edifice, eighty feet by forty, with an elegant tower, erected by Hon. Samuel Williston, is appropriated to the following purposes. The lower story is the Chemical Laboratory. The second story consists of two rooms for the meetings and libraries of the Literary Societies. The third story forms a spacious hall for the meetings of the Alumni of the College, and other purposes.

GYMNASIUM.

This Building, now in the course of erection, will be finished, it is hoped, and ready for use by the begining of the winter term. It is of stone, 70 feet in length and 50 feet in breadth, two stories high, with a basement cellar, and will probably cost about $7000. This Building used in connection with the College Grove, in front of it, will furnish fine opportunities for Physical exercise and culture.

EXTRA INSTRUCTION.

From the preceding statements it will be seen that ample opportunities are presented in this College for the study of Natural Philosophy, Chemistry, Geology, and Natural History, by persons, who do not join the regular classes. Such students are received, if they desire it, by any of the Professors in those departments; the amount of instruction and compensation being a matter of private agreement with the several teachers. In the Literary departments also, a similar arrangement may be made with the Professors, if desired.

SCHOLARSHIPS.

Several Scholarships have been established in the College, and are now available on the conditions specified by the Donors.

The first was founded by Eleazar Porter, Esq., in 1857, and is designed for some student whom he shall nominate. Two have recently become available, under the will of the late President Moore, the receivers to be nominated by the Brookfield Association of Ministers; two or three others, under the will of the late Asahel Adams, Esq.; and one is from the young men of the First Evangelical Congregational Church in Cambridgeport. Six have been recently established by Samuel A. Hitchcock, Esq., of Brimfield, Mass., who has given the College $10,000, as a foundation for the purpose. In designation and annual amount, they are nearly as follows:

The Porter Scholarship, $60; the Moore Scholarships, $140 each; the Adams Scholarships, two of $50 each, and one about $20; the Cambridgeport Scholarship, $150; and the Hitchcock Scholarships, $100 each.

PRIZES.

Sweetser Prizes, for excellence in Writing or Speaking. These prizes are the gift of Joseph A. Sweetser, Esq., of New York, and are as follows: For composition, to the Senior Class, first prize twenty-five dollars, the second fifteen dollars; to the Junior Class, first prize twenty dollars, and the second prize ten; for Declamations, to the Sophomore and Freshman Classes, each, first prize ten dollars, second prize five.

Hardy Prizes, for improvement in extemporaneous speaking. These are given by Alpheus Hardy, Esq., of Boston, and are as follows: First prize, fifty dollars; second prize, thirty dollars; third prize, twenty dollars.

Mather Prizes. These are given by Henry Mather, Esq., of Binghamton, N. Y., forty dollars for the best, and twenty dollars for the next best examination, both oral and written, in the Greek of Sophomore and Junior years.

The Prizes for last year, were awarded as follows:
